

CRISCOM

SMART SOLUTIONS FOR SAFER EMERGENCIES.

WWW.CRISCOM.COM

CrisisCom is a smart emergency response device system with stability, cameras, sensors, and remote control, transmitting critical data to an operations command center.

SPECIAL FEATURES OF CRISISCOM

- Cameras
- Modular Capability
- Environmental Sensors
- Remote Control Capabilities
- Wear-Resistant and Waterproof
- Gyroscopic Equilibrium

DETAILS OF CRISISCOM

Software aspect

Operating system

A robust and secure operating system that seamlessly integrates sensor data, manages real-time information and ensures efficient data transmission for optimized emergency response.

Software functionality

Streamlining emergency response, the software offers real-time data analysis, remote control, and modular adaptability for optimized decision-making in critical situations.

Language

User-friendly and multilingual interface for seamless communication, enhancing accessibility and effectiveness in emergency response.
